

How do you measure how well a school is doing? In our estimation, it's more than scores on high-stakes tests. Schools should show that they are supporting children along the educational pipeline toward college, career, and community readiness. Are our students attending school? Are they graduating? Are they going to college? And how successfully are schools reducing the achievement gap between high-needs and non-high needs students?

**THE 2020-21 STRIVE HI SCHOOL PERFORMANCE REPORT** is an annual snapshot of a school's performance on key indicators of student success. This report shows schools' progress on federally-required indicators under the Every Student Succeeds Act; in addition to state-adopted measures focused on student equity, achievement and success. These results help inform action for teachers, principals, and other stakeholders.

#### **Our Story**

The Vision of Kamalani Academy Charter School

The need behind the Kamalani Academy Vision is well described by the eminent educator Dr. Linda Darling Hammond of Stanford University:

"The new mission of schools is to prepare students to work at jobs that do not yet exist, creating ideas and solutions for products and problems that have not yet been identified, using technologies that have not yet been invented. We must teach our way out."

In the years ahead, it will not be enough to know math, science, and reading. Those who are successful will be able to deal with an increasingly rapid rate of change where the future will be unknown. Already, employers are saying that their most valuable employees are those who are flexible, creative, persistent, communicate well, listen, and can work in teams. Our Vision is to have our students learn these "soft skills" through arts integrated education.

Kamalani's Vision is "To create a space where children become leaders, prepared for a Twenty-First Century we cannot even imagine."

The Mission of Kamalani Academy Charter School

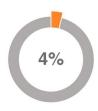

"Kamalani Academy believes that each of our students is born with great abilities. We use the arts to release those talents. The arts enhance the learning of core academic subjects and also provide students with vital skills such as: creativity, communication, leadership and collaboration."

#### **About Our School**

Principal | Amanda Langston Grades | K-8 808-203-2993 kamalaniacademy.org

178

students enrolled

of students are English learners

of students are eligible for Free or Reduced Lunch

of students receive special education services --

of special education students are in general education classes most of the day

#### **Pandemic Related Considerations When Assessing Strive HI Results**

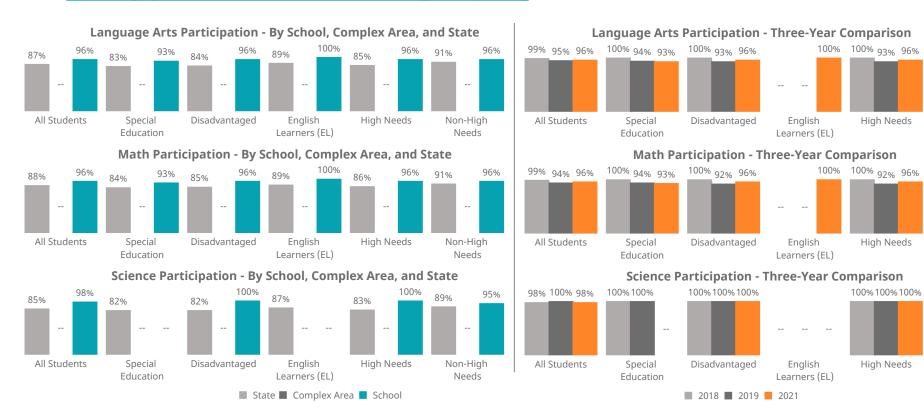

Throughout this 2020-21 school year (SY), numerous pandemic-related challenges arose across Hawai'i's public schools. Many challenges were common across schools, yet others were unique to a particular school or group of schools within a particular geographic area. The pandemic's impact on instruction and learning had an effect on teachers and students, and those conditions should be considered when examining student achievement and school performance results.

This section provides important contextual information that should be considered when assessing 2021 Strive HI results, and when comparing 2021 results to prior year results. To the extent data were available, several key metrics are presented to provide context to learning, instruction, and test-taking during the past school year, including participation rates, students learning modalities, and access to adequate digital devices and internet connectivity.

### How many students participated in testing?

These bar charts display participation rates across language arts, math, and science for All Students and high-needs subgroups. School rates are accompanied by complex area and statewide rates allowing for side-by-side comparisons. Consideration should be given to the following: (A) Participation rates should always be taken into consideration when reviewing proficiency results, and especially so, when students' modes of learning, instruction, and test-taking options are disrupted or altered during the school year; (B) School participation rates should be compared across key subgroups as well as complex area and statewide rates; (C) Participation rates allow readers to judge the extent proficiency and other test derived results such as growth, achievement gap, and 3rd and 8th grade literacy rates, are representative of all students eligible to test; and (D) When participation rates drop below 95%, one should ask, "To what extent are these results reflective of all students eligible to test?" "Are certain student subgroups over- or under-represented?" "Do those differences skew achievement results?" The following link provides guidelines and considerations when examining achievement results derived from low-participation rates, as well as other important pandemic related considerations: Appropriate Use of SY 2020-21 Hawayi' Statewide Assessment Program (HSAP) Results.

#### In what learning environment did students receive instruction?

This bar chart shows the percent of students receiving instruction completely in-person or in a blended or completely virtual setting. Consideration should be given to the following: (A) Students' learning modality varied across schools; (B) Some students seemed to achieve better in-person, while blended or completely virtual settings may have been more conducive to learning for other students; (C) A student's learning modality can serve as a useful comparison when examining individual student achievement based on their learning modality, however, caution should be given when drawing such conclusions; and (D) Certain students may be more likely to attend in-person compared to other types of students, that is, students with disabilities. Schools may look into these students to determine if that is the case before drawing conclusions about performance based on students' learning modality.

## How many students did not have adequate digital devices or internet access?

The following show the number and percent of students who did not have a digital device or internet access to adequately engage in distance learning.

-- -- State: 1.9% State: 2.8%

#### 2020-21 Strive HI School Performance Results

IMPORTANT: Due to COVID-19, in SY 2020, no statewide tests were administered. In SY 2021, Hawai'i public schools administered a shortened version of the statewide assesssment, a skip-year growth methodology was used, and participation rate penalties were waived as approved by the U.S. Department of Education.

## How are students performing in each subject?

Measures the percent of students meeting the standard/who are proficient on state assessments. No participation penalty was applied to 2021 proficiency results.

Language Arts Math Science

## How are students performing compared to others?

Compares the percent of students meeting the standard/who are proficient on state assessments.

Language Arts Math Science

## How are student subgroups performing?

High Needs: English learners, economically disadvantaged, and students receiving special education services. Non-High Needs: All other students.

Language Arts		Math		
50%	29%	22%	17%	
Non-High Needs	High Needs	Non-High Needs	High Needs	
Achievement gap:  21 points		Achievement gap:  5 points		

of students learning English are on-track to English language proficiency

## How are students' academic progress measured?

Schools' Smarter Balanced growth is represented by a Median Growth Percentile (MGP) which ranges from 1 - 99. HSA-Alt & KAEO growth shows the percent of students making one year of growth.

Smarter Balanced		HSA-Alt		
54	19		Language Arts	Math
<b>5</b> 4	TJ	KAEO		
Language Arts	Math		Language Arts	Math

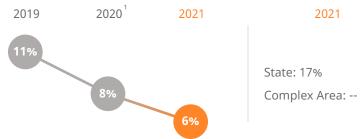

## How many 3rd & 8th graders read on grade level?

of 3rd graders read near, at, or above

of 8th graders read near, at, or above grade level

# How many students missed 15 or more days of school this year?

#### How do students feel about their school?

Measures percent of students reporting positive school climate as measured by the Panorama Student Survey by school level.

Upper Elementary (For grades 3-5)	School 71%	State <b>75%</b>	
Secondary (For grades 6-12)	72%	63%	

 $<sup>^{1}</sup>$ 2020 chronic absenteeism is based on absences only through the end of the third quarter (3/13/20). As such, the rate is not directly comparable with years prior to or following 2020, which were based on absences through May 1 of each school year.

How do you measure how well a school is doing? In our estimation, it's more than scores on high-stakes tests. Schools should show that they are supporting children along the educational pipeline toward college, career, and community readiness. Are our students attending school? Are they graduating? Are they going to college? And how successfully are schools reducing the achievement gap between high-needs and non-high needs
